Impression:

- **No significant abnormality detected in this study.**

****Suggested clinical correlation.**

Please note: That this report is only a professional opinion based on image findings and is not a diagnosis by itself. Ultrasound being a real time imaging modality shows intra and inter observer variations in measurements and findings depending on the patients built, obesity, bowel preparation and bladder status. Kindly correlate USG observations with clinical, biochemical and histopathological findings. If any discrepancy is found please suggest rescan. All abnormalities cannot be detected. Hence this report has limitations and is not for medico legal purposes.
